

Location:

Our preschool will be based in our renovated Year One classroom. This space offers an excellent, developmentally appropriate foundation for a new preschool. The inclusion of dedicated, child-sized toilets and a kitchenette significantly enhances independence and functional care, while the bi-folding doors create a high-quality free-flow environment between the Preschool and Reception classes, fostering collaborative play and smooth transition.

This setup provides excellent, secure, and compliant access to early years provision, fulfilling [EYFS statutory requirements](#) for daily outdoor play. A secure side entrance with intercoms ensures only authorised access, while enabling, stimulating outdoor areas enhance children's social, physical, and emotional development. Regular outdoor play is proven to increase health, boost immunity, and provide a low-stress environment for building confidence.

In addition to accessing the outside and inside areas of our preschool setting, the children will also access our Nature trail and Forest School to further develop confidence, resilience, risk-management, and social cooperation. These natural environments promote physical health, gross motor skills, creativity, and a deep, empathetic connection to the natural world.
